(57) **ABSTRACT**

A window shade is formed of a top rail, a pliable shade body, and a pull cord set. The top rail has an arresting member and two actuating members. The shade body is provided with a plurality of cross pleats, a middle tube, and a bottom tube. The middle tube is provided with a middle cross rod fitted thereinto. The bottom tube is provided with two bottom cross rods fitted thereinto. The shade body can be folded to have an ornamental form by the pull cord set in conjunction with the arresting member and the two actuating members.
